

**ICT02**  
**Telecommunications**  
**Training Package**  
**Update**

**Invitation to**  
**Participate in**  
**Consultation**

## Communications — Telecommunications — IT Future Requirements

### Why should I participate?

- You are interested and are a stakeholder in the telecommunications, communications, broadcasting or IT industries
- You have an understanding of the telecommunications and related industries
- You can provide technical expertise
- Great opportunity to have input into training for the next generation of workers for communications and telecommunications
- Discuss the training needs for the National Broadband Network and address technological convergence issues

### What's in it for me?

- Networking with like minded colleagues
- Influence the future national communications and telecommunications training
- Broader picture of the industry and the impact of technological change and convergence issues

### What will be the consultation outcomes?

- Identification of the latest industry issues
- Identification of any skills shortage areas
- Identification of new technologies and training needs
- Identification of industry sectors in a changing technological environment
- Identifying strategies for future proofing the training framework

### What will be required of me?

- Up to half day of your time
- Participation in a focus group
- Possible face to face or written follow up in September to validate outcomes
- Your innovative ideas

Building is called **Institute of Applied Logistics**

**67 Regency Rd  
In the Board room  
7.45 for 8AM to 10.30  
Breakfast supplied**
